

Welcome To Enhanced Life Options Group

Beyond decent food, clothing, shelter and health care, we think all people want, regardless of disabilities, to have comfortable surroundings, family and friends at their side, and the opportunity for satisfying productive activity.

Many people also want the opportunity to be helpful to others and later look back upon their lives with peace of mind and satisfaction. Disabilities do not have to be handicaps. People are handicapped by a lack of resources available to them. An accessible world can provide new opportunities for a good life.

We develop and carry out enhanced life option plans for people with disabilities. We provide information, consulting, advocacy, mentoring and trust related services for the disabilities community, including special needs trusts, supplemental needs trusts, pooled trusts and trusts for independent living. Members of our group have been active in the disabilities community for many years. We are a non-profit organization committed to enhance the lives of people with disabilities. We serve all people with disabilities regardless of category of disability.
